ARCHITECTURAL ENERGY CORPORATION

REM/*Rate* Advanced Training

RESNET 2014

V. Robert Salcido, P.E., Director of REM Programs

Brian Christensen, HERS & LEED-H Green Rater, Senior Engineer

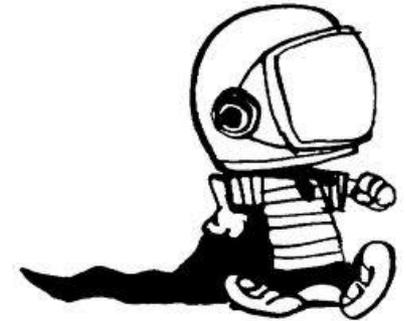

Architectural Energy Corporation

February 23, 2014

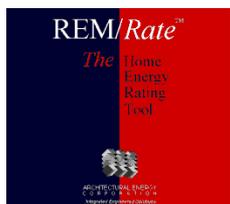

■ V. Robert Salcido

- ➔ Director of REM Programs
- ➔ Background in Environmental and Civil Engineering
- ➔ 20+ years experience in energy and building science

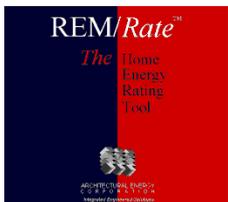

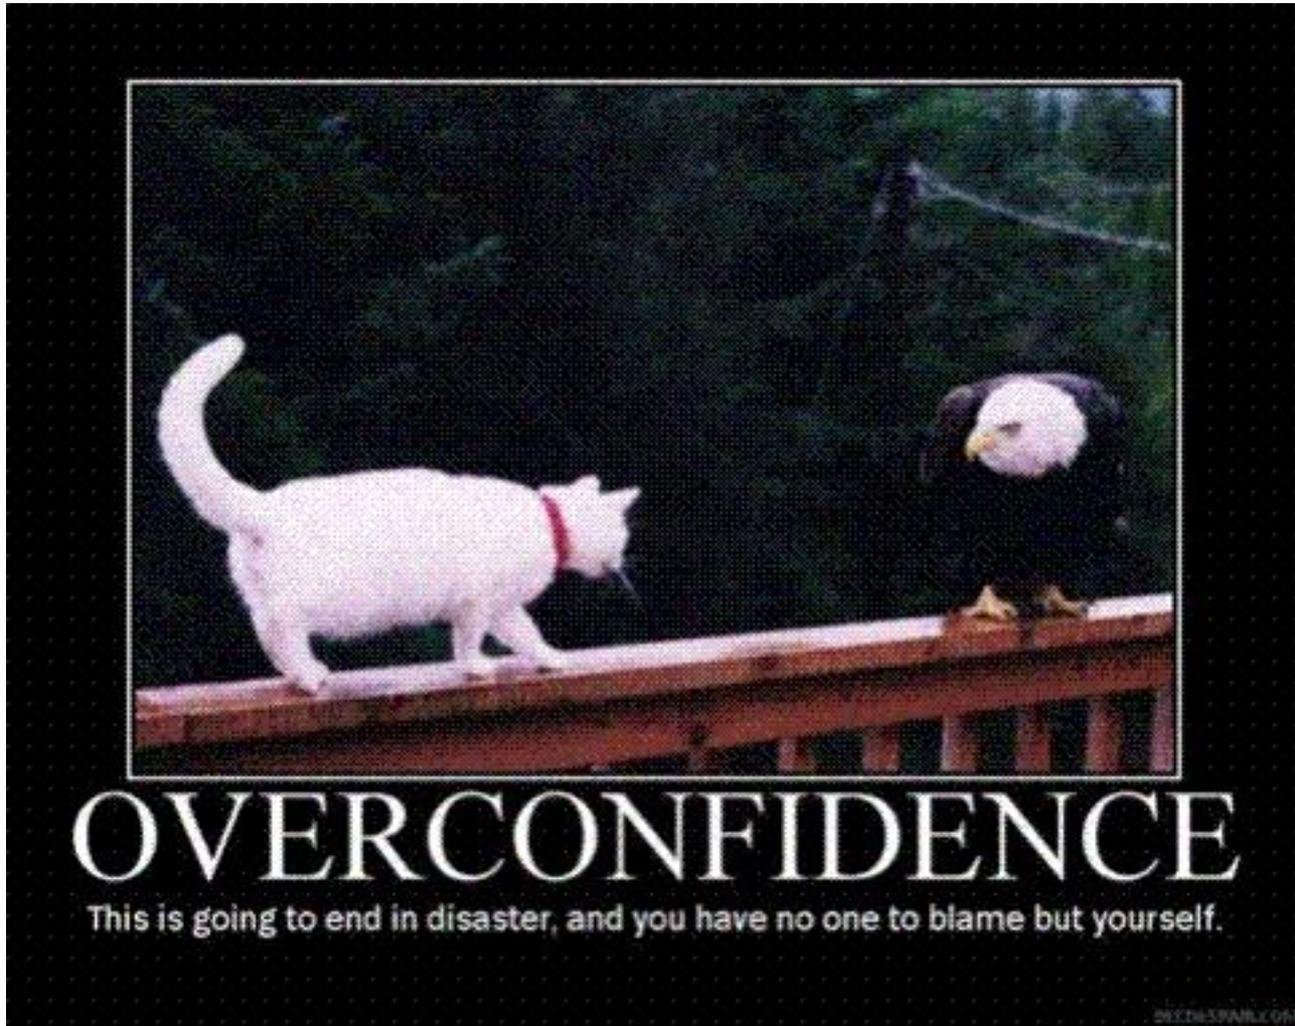

■ Brian Christensen

- ➔ Background in Physics and Mechanical Engineering
- ➔ 20+ years experience in solar energy and building science (including 8 years of HERS Ratings)

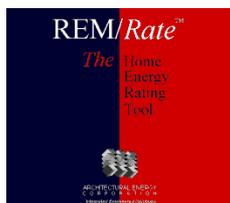

INTRODUCTION

GOALS

- 1) Understand the new features in *REM/Rate*
- 2) What is going on behind the scenes at AEC
- 3) Understand what is coming with *REM/Rate CLOUD*
- 4) Training in *REM/Rate* advanced/unknown features
- 5) Understand what you want/need in software

OVERVIEW

■ REM/Rate Installation

- Installation
- REM Files

■ New Features

- Adiabatic Floors and Ceilings
- ENERGY STAR v3.0 Rev 7
- eGRID 2012 emissions
- LEED for Homes Report
- RESNET Life Cycle Costing
- Numerous unseen changes/fixes

■ REM/Rate Cloud

- Licensing
- Operation
- Features
- Benefits
- Cons
- Current Desktop

■ Printing/Data Output

- Multi-Building Reporting
- Report Grouping
- Print Permissions
- Logos
- Data Export

■ Libraries

- File Opening
- Temporary Libraries
- Library Sets and Transfer

■ Analysis

- Existing Home Toolset
- User Defined Reference Home
- Batching

■ Technical

- Cond vs Uncond Foundations
- Sealed Attics
- Thermal Boundaries
- Utility Rates
- Integrated Systems
- GSHP

■ Tricks

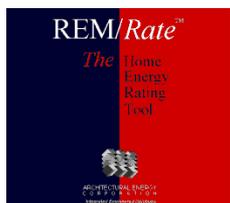

- Equation Solver
- Tabs
- Docking Panes
- Reset Window Layout
- Default Building
- Window Rotation
- Registration

■ Options

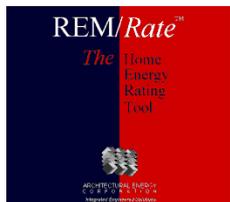

- Binding Adjustments
- Home Energy Ratings
- IECC
- EPA / ENERGY STAR

■ Discussion

■ Q & A

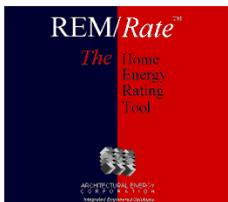

TECHNICAL SUPPORT

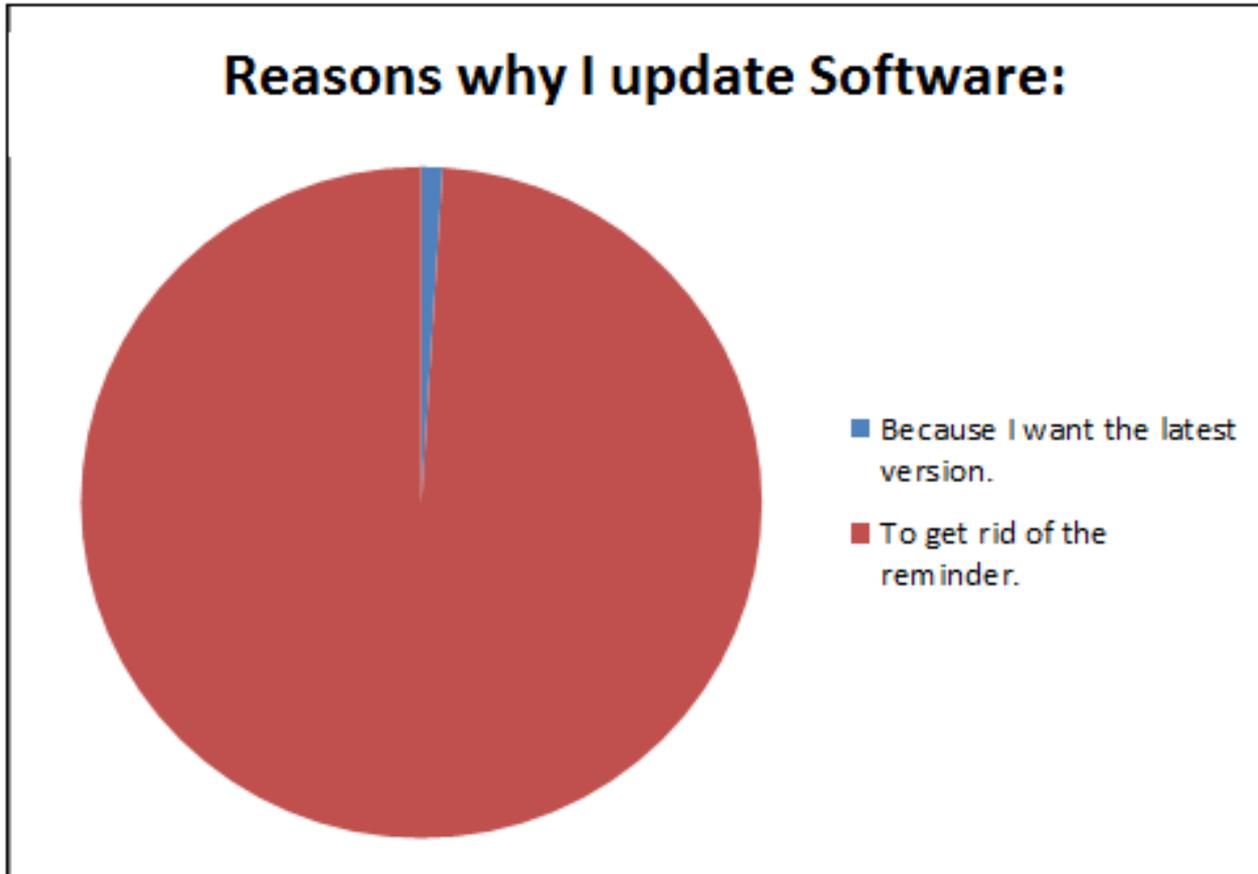

Two Installations

- **Updater** – updates REM/Rate executable file but does not overwrite libraries or building files.
- **Full Install** - if installed in an existing REM/Rate folder, then it will overwrite everything. Library transfer is possible from old versions to new, but not reverse.

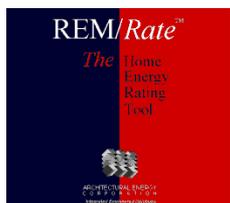

Having multiple REM/Rate versions on your computer is possible.

NEW FEATURES

- Adiabatic floors and ceilings
 - Adiabatic Floor is set as a location
 - Adiabatic Ceiling is set as a type in library
- ENERGY STAR v3.0 Rev 7
 - Removed window/door exclusion from 2009 IECC UA Calculation
 - Added a slab floor insulation exemption checkbox
 - EPA Indoor airPLUS checklist no longer counted toward checklist requirements
 - Option for Total Duct Leakage for Rough-In added
 - ENERGY STAR v3.1 coming out later this year (working with EPA now!)
- eGRID 2012 emissions
- LEED for Homes Report
- RESNET Life Cycle Costing
- Numerous unseen changes/fixes

NEW FEATURES

Enhancements in REM/Rate™ v14.4.1 include:

General:

Corrected IECC Labels to show dominant ceiling type rather than listing each type. The IECC Certificate shows a listing of each type.
Updated the Canadian version to remove printing restrictions for uploading to the RESNET Registry.

Bugs in v14.4 that were fixed in v14.4.1 include:

General:

Fixed the bug in the duct settings for the 2004 and 2006 IECC Design Building. This affected the Tax Credit calculations that are now fixed and getting the same results as past Tax Credit scores in REM/Rate v14.3.
Fixed a bug in the ENERGY STAR and DOE-Challenge Home UA Calculations. Now the reports show similar UA values to the 2009 and 2012 IECC UA Reports.
Fixed a bug with the REM/Rate PNW Version with the Building Option Package (BOPs) Reference Homes due to incomplete heating and water heating settings.
Fixed XML import bug where surfNum, wallNum, heatingEquipNumber, coolingEquipNumber fields were incorrectly set to the first item of the list.

Enhancements in REM/Rate™ v14.4 include:

General:

Added the RESNET energy savings life cycle cost methodology.
Added the ability to model adiabatic ceilings for individual apartments under conditioned space. This allows the apartment shell area to be calculated correctly.
Per EPA/ENERGY STAR request, added Slab Insulation exemption checkbox to the Mandatory Requirements screen.

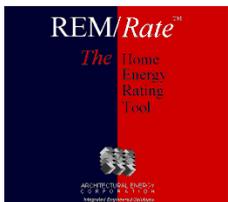

Reports:

Added a LEED for Homes code and report.
Added ecoSelect HERS Index label for Southern Energy Management.
Added the Illinois 2012 Performance Report to the group that can show an unofficial report using mechanical equipment which meets the Federal Minimum efficiencies.
Added the Texas Performance - North Central (NCTCOG) code report, which requires an access code provided by the North Central Texas Council of Governments.

Bugs in v14.3 that were fixed in v14.4 include:

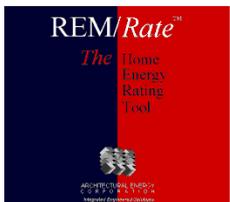

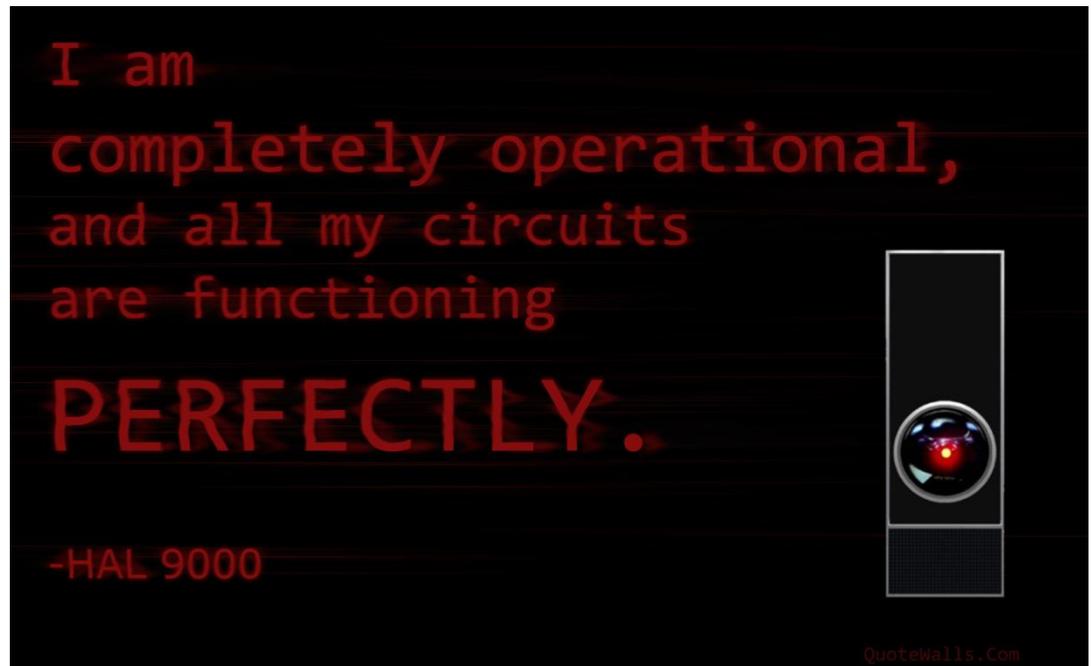

General:

Corrected the U-value and SHGC check for NC codes. The NC code reports have been removed from REM's Old Reporting tool, and are only available in the New Reporting tool.
Corrected subtle bug in SHGC evaluation in UA Compliance reports; the 2009 & 2012 IECC set a maximum value for the area weighted average SHGC, while the other codes use the worst individual SHGC in the building instead of an average.
Corrected bug in internal gains for Multifamily whole-building models. Prior to the fix, increases in mechanical ventilation power caused a decrease in the annual consumption.
Corrected bug which checked insulation grade for adiabatic surfaces, which created problems for Multifamily ENERGY STAR ratings. Insulation grade is now ignored for adiabatic surfaces.
Corrected foundation insulation bug for ENERGY STAR, where exterior foundation insulation was adequate to allow grade 2 cavity insulation.
Adiabatic surfaces are no longer being listed as the dominant assembly type in reports with assembly summaries. Now, only assemblies which are part of the thermal envelope are included in the "dominant assembly" summaries.

REM WEB TOOL

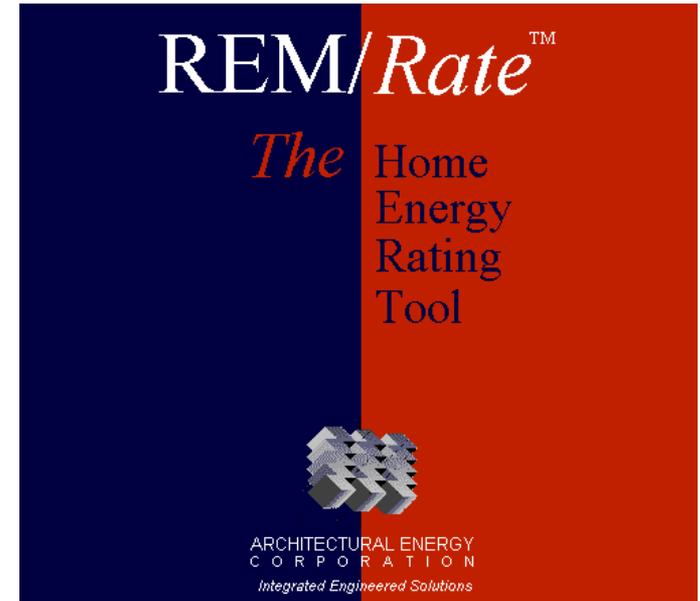

- ❖ Licensing
- ❖ Operation
- ❖ Features
- ❖ Benefits
- ❖ Cons
- ❖ Current Desktop

REM WEB TOOL – MODULAR LICENSING

Three Core Modules

1. REM Core (Energy Analysis)
 2. REM Compliance (Code Compliance)
 3. REM HERS (HERS Ratings)
- ❖ REM/Rate
 - ❖ REM/Rate Light
 - ❖ REM/Rate Research and Oversight
 - ❖ REM/Rate Educational
 - ❖ REM/Design
 - ❖ REM/Design Light

Each license can be modified based on functionality desired

Batch Operation

REM WEB TOOL - OPERATION

REM WEB TOOL - OPERATION

The screenshot shows the REM Rate web application interface. The browser address bar indicates the URL is localhost:61672/app/libraryset/details/3. The page title is 'REM Defaults - REM/Rate'. The user is logged in as 'bgianninoto@noresco.com'. The main content area displays a configuration for 'REM Defaults' with a sidebar on the left listing categories: Slab Floors (4), Frame Floors, Foundation Walls, Above-Grade Walls, Windows/Skylights, Doors, and Ceilings.

The 'Slab Floors' section is active, showing a table with the following data:

Name	Perimeter Ins. R-Value	Under Slab Ins. R-Value	
R-7 Perimeter	7.0	0.0	Edit
R-5 Perimeter	5.0	0.0	Edit
R-7 Perimeter (Copy)	4.4	4.4	Edit
Uninsulated	0.0	0.0	Edit

Other sections like 'Frame Floors (Placeholder)', 'Foundation Walls (Placeholder)', 'Windows/Skylights (Placeholder)', 'Doors (Placeholder)', and 'Ceilings (Placeholder)' also display similar tables with placeholder data.

A context menu is visible over the 'R-7 Perimeter (Copy)' entry in the 'Slab Floors' table, showing 'Copy' and 'Delete' options.

REM WEB TOOL - OPERATION

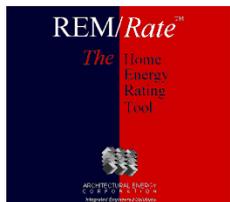

The screenshot shows a web browser window with the URL `localhost:61672/app/libraryset/det`. The page title is "REM Defaults - REM/Rate". The breadcrumb navigation is "Home / My Library Sets / REM Defaults".

Slab Floors

Name	Perimeter Ins. R-Value	Under Slab Ins. R-Value	
R-7 Perimeter	7.0	0.0	Edit
R-5 Perimeter	5.0	0.0	Edit
R-7 Perimeter (Copy)	4.4	4.4	Edit
Uninsulated	0.0	0.0	Edit

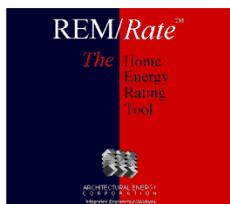

Frame Floors (Placeholder)

Name	Perimeter Ins. R-Value	Under Slab Ins. R-Value
R-7 Perimeter	7.0	0.0
R-5 Perimeter	5.0	0.0

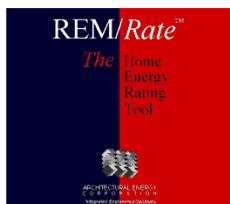

REM WEB TOOL – BENEFITS/FEATURES

- ❖ Ability to run REM/Rate on any browser
- ❖ No installations
- ❖ Quicker updates
 - ❖ Streamlined Input
 - ❖ Tracking changes to building model
 - ❖ Know building status
 - ❖ Ability to share and monitor building files
 - ❖ Online dashboard for better QA
 - ❖ Online license renewals and payments
 - ❖ Onboard counter for ratings and fees

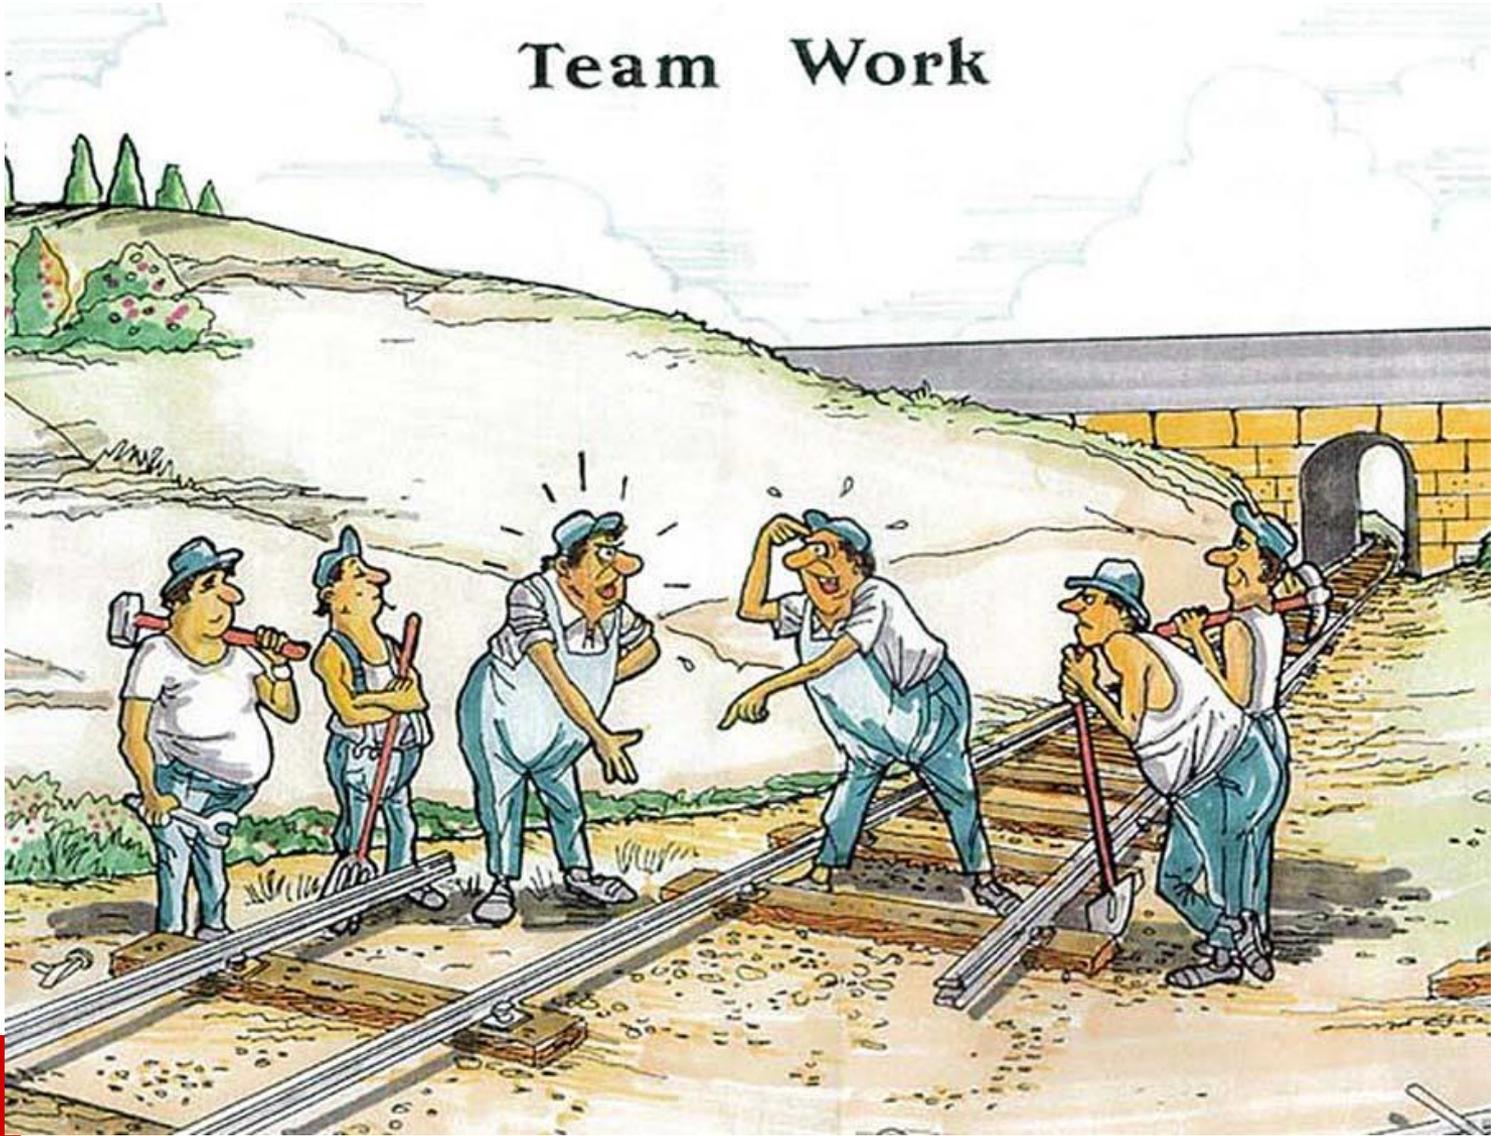

REM WEB TOOL - CONS

- ❖ Only allow limited versions
- ❖ Will not operate without internet access
- ❖ May take some time to re-familiarize to new format

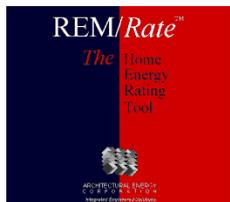

TEAMWORK

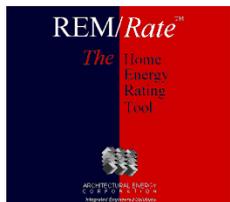

What can you do with today's REM?

(a survey of features that you might not know about,
or have forgotten were there)

PRINTING/DATA OUTPUT

- Multi-Building Reporting – demo
- Report Grouping – demo
- Print Permissions – demo
- Logos
- Data Export

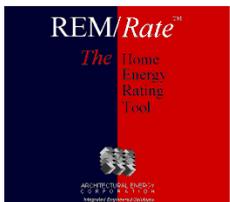

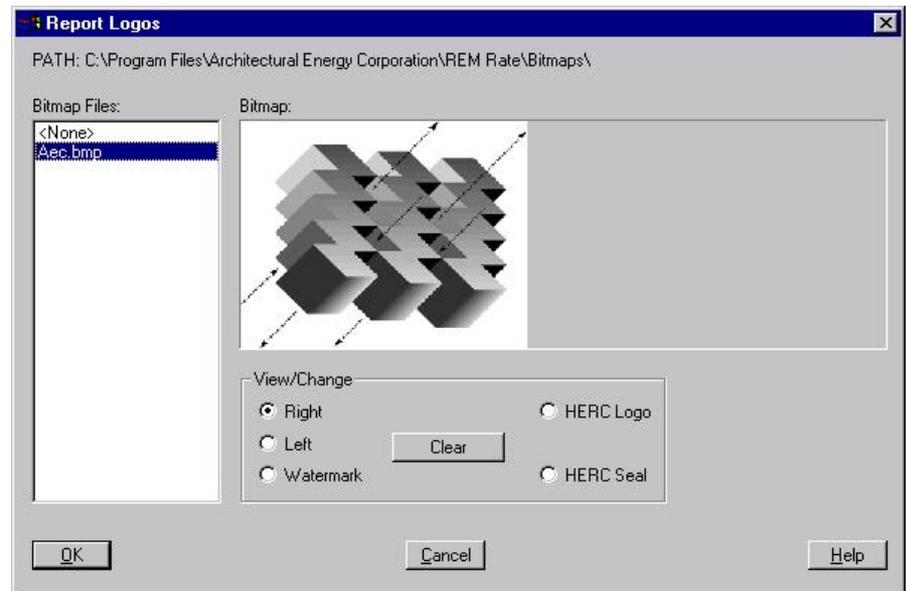

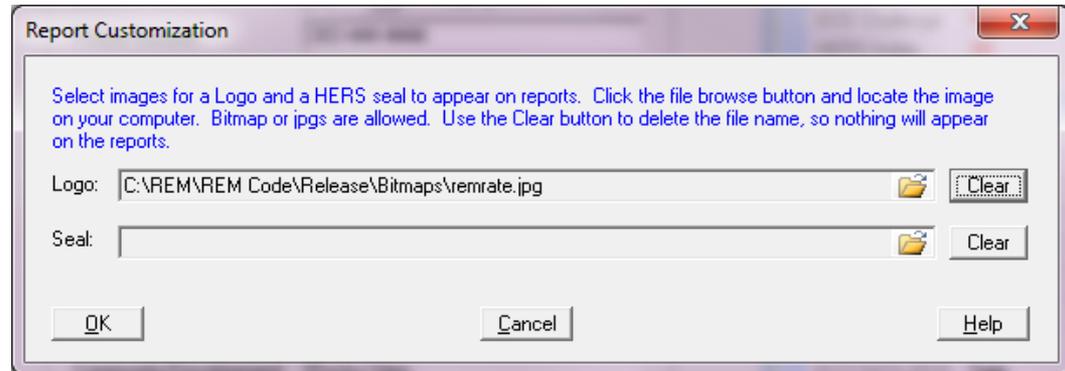

PRINTING/DATA OUTPUT– LOGOS ON REPORTS

New Logos →

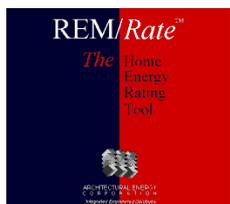

Old Logos

- Reports->Old Logos...
 - ➔ Select the radio button representing the position you want to add a logo.
 - ➔ If there is already a logo selected for that position, its filename will be highlighted and the image will be visible.
 - ➔ Logo bitmaps must be placed in the path shown at top.

Export to Database

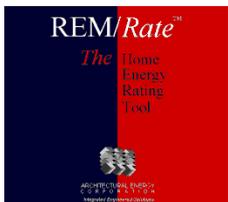

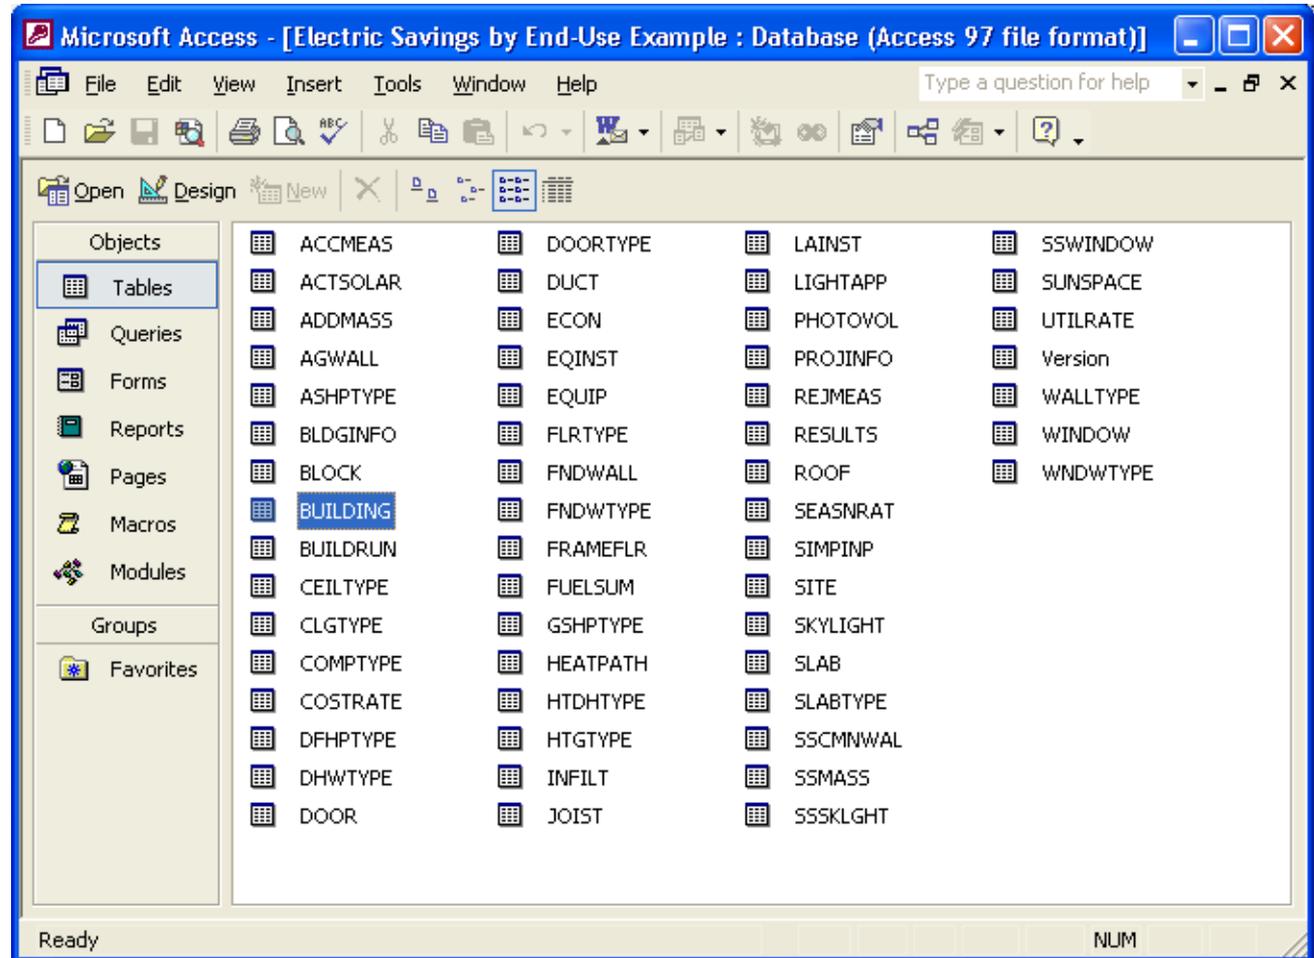

- Access or SQL relational database
- All input, nearly all output
- Use for archiving, data mining (w/ queries)
- Reference homes can be exported
- Extensive documentation on Help menu

PRINTING/DATA OUTPUT – DATA EXPORTING

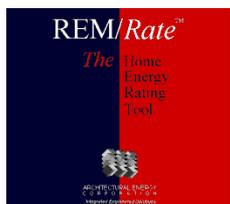

All the table types in the REM export:

You'll want someone with experience to write your queries!

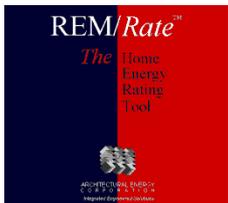

CSV

- “Comma separated values”
- Imports into Microsoft Excel
- Single building results
 - Same file name as building file, *.csv extension
 - Toggle on/off in Options menu
- Batch
 - Named Batch.csv
 - Always generated

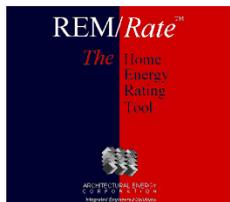

TEAMWORK

Improving building performance since 1982

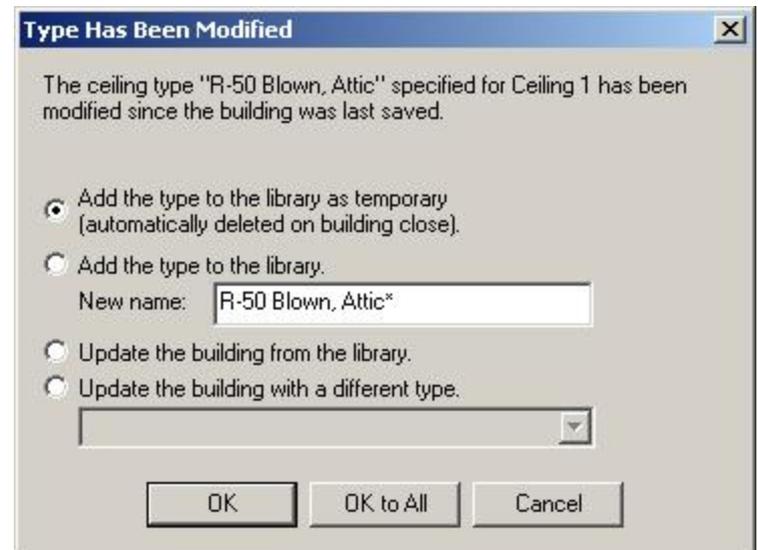

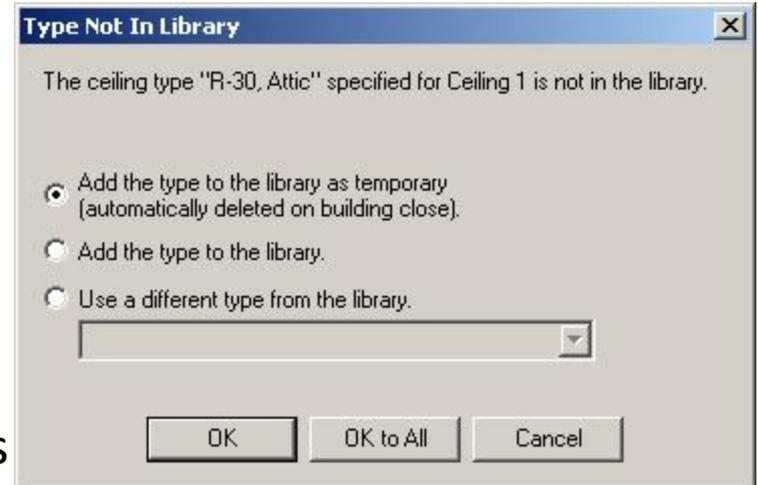

LIBRARIES

- File Opening messages
- Temporary Libraries
- Library Sets and Transfer

LIBRARIES – FILE OPENING

- Messages when opening building files
 - ➔ **Temporary** library entries
 - Appends an * to name
 - Avoids changing building file and voiding print permissions
 - ➔ **Adding** to the library
 - ➔ **Updating** a building from the library
 - Using a manually selected entry
 - Or, the library version of a modified entry

LIBRARIES – FILE OPENING

Component	U-Value	State
R-15 - Stone	0.079	
test	0.017	
R-13****	0.085	
Finishd BRICKonBlk 2	0.122	
R40E Fin BRICKonBlck	0.022	
R40E 2x6 R19g1	0.017	
Uninsulated Stud*	0.270	tmp
Uninsulated Concrete*****	0.662	tmp

- Use of Temporary Library entries makes life easier (denoted with an “*” and “tmp”)
- QAD’s: Temp. library feature provides a way to spot new entries that need review
- Try not to save buildings with temporary libraries as this will save the asterisk and continue to add them

LIBRARIES – MOVING

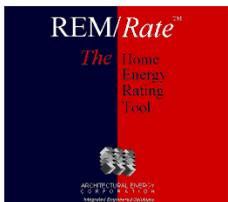

■ Copying libraries, or Backing up

➔ Full Library Sets

- Easiest way: copy the entire folder containing the Library Set.
 - ➔ Default name & location: **C:\...\REM Rate 14\Libraries**
- If doing backup, archive it in a safe place

➔ Library Subsets

- Use Transfer Files (Libraries Menu)
 - ➔ Select which entries to transfer/share

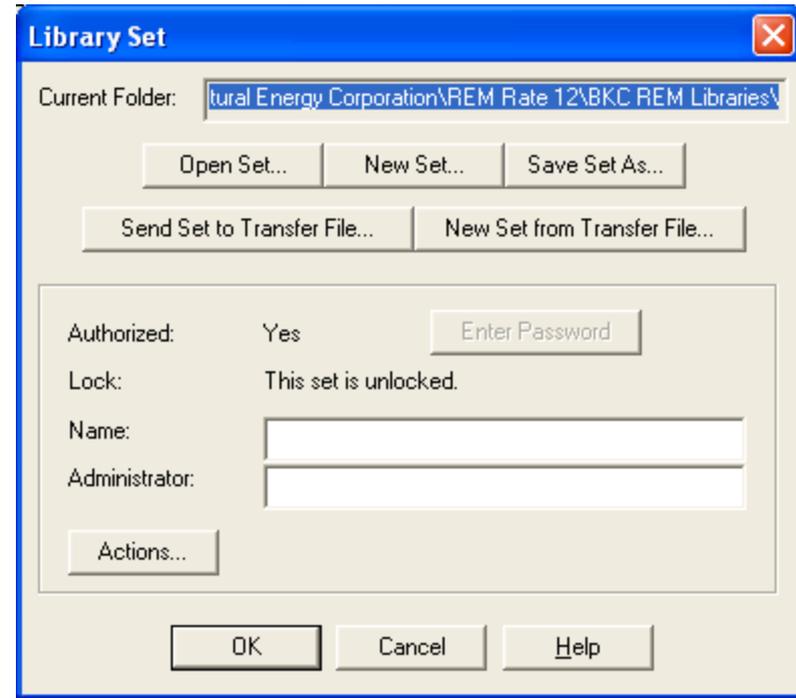

LIBRARIES – LIBRARY SETS

■ Library Set (Libraries Menu)

➔ You can have specialized library sets, such as:

- ❑ Libraries required by a weatherization program
- ❑ New construction libraries

➔ Change sets when needed

ARCHITECTURAL ENERGY
CORPORATION
10000
10000
10000

Improving building performance since 1982

ANALYSIS

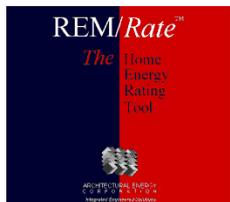

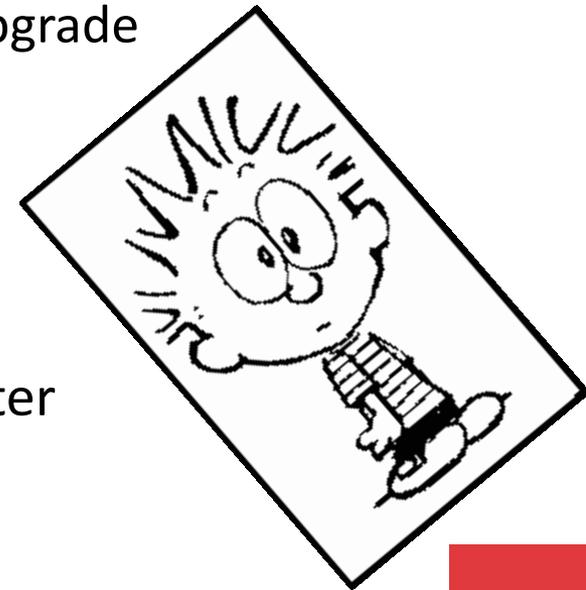

- Existing Home Toolset
 - Utility Bill Disaggregation
 - Improvement Analysis
- User Defined Reference Home
- Batching

ANALYSIS – EXISTING HOMES

■ Existing Home Toolset Demonstration

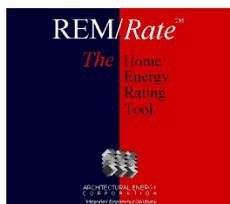

- ➔ Utility Bill Analysis
 - Including efforts to calibrate model of my own home
- ➔ Component Consumption Graphic
 - To see what parts of house most need upgrade
- ➔ Improvement Analysis
 - Economic optimization of improvements
- ➔ Multi-building comparisons of before & after

ANALYSIS – USER DEFINED REFERENCE HOME

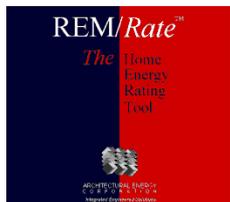

■ User-Defined Reference Home

- ➔ Create custom reference homes
- ➔ Local codes, utility program baseline
- ➔ Uses text file w/ scripting language
- ➔ Example provided w/ software: m92bstn.udr
- ➔ Start w/ copy of example, retain *.udr extension
- ➔ Extensive documentation in help system

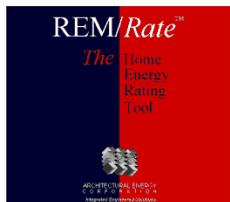

■ **Batching**

- ➔ Building file modifications (File menu)
- ➔ Results (Reports menu)
- ➔ Batch report, includes ENERGY STAR, tax credit status
- ➔ Can generate UDRH and other reports
- ➔ Export database
- ➔ ENERGY STAR labels, mailing labels

TECHNICAL

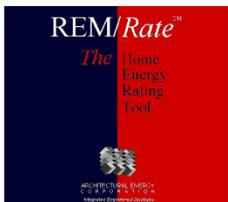

- Conditioned vs Unconditioned Foundations
- Sealed Attics
- Thermal Boundaries
- Utility Rates
- Integrated Systems
- Ground Source Heat Pumps

TECHNICAL – COND VS UNCOND FOUNDATIONS

- Conditioned vs. Unconditioned Basements
 - ➔ Conditioned - setpoint is maintained
 - ➔ Unconditioned - temperature calculated based on connections to conditioned/ambient, gain from ducts, equipment; generally floats 5 - 10 degrees lower than setpoint.

- Conditioned Crawls

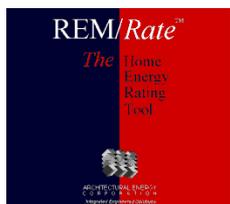

■ Sealed Attics

- ➔ DON'T model as Vaulted Ceiling or include the volume in Conditioned Space.
- ➔ DO use the new Ceiling Type (Sealed Attic) in the Ceiling Input screen.
- ➔ DO pay attention to the total exposure area of the attic, not just the roof area. (Attic Exterior input)
 - Sealed attic gable end walls can be modeled in the Above Grade Walls screen.

■ Thermal Boundary

- ➔ For unconditioned basements and crawlspaces, REM will use insulation levels to determine where the thermal boundary is – frame floor or the foundation wall.
- ➔ REM does allow the user to choose the thermal boundary location.

TECHNICAL – UTILITY RATES

- Utility rates
 - ➔ Seasonal
 - ➔ Block rates

The screenshot shows a software dialog box for configuring utility rates. It includes fields for Utility Name, Fuel Type, and units. It also features a table for seasonal rates and a table for block rates.

Utility Name: RockyMtnPwr 3/11

Fuel Type: Electric | kWh

Seasons:

Start	Through
JAN	DEC

Add | Delete

Start Month: JAN | End Month: DEC

Rates for Selected Season:

Service Charge (\$/Month): 20.00

Min	Max	Rate
0	500	0.4770
500	1000000	0.9520

Add | Delete

Block Range: 0 to 500

Rate (\$/kWh): 0.4770

OK | Cancel | Help

TECHNICAL – INTEGRATED SYSTEMS

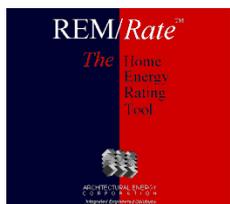

■ Integrated space/water heating systems

➔ Boiler w/ side arm tank

- Two systems: space heating, water heating
- Use boiler AFUE for tank recovery efficiency
- Set tank EF = $0.75 * AFUE$

➔ DHW tank serving space heating coils

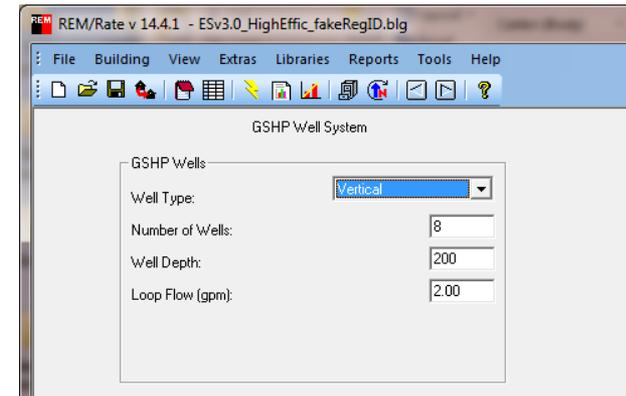

- Two systems: space heating, water heating
- Use tank recovery efficiency for space AFUE
- Commercial water heater

TECHNICAL – GROUND SOURCE HEAT PUMPS

■ GSHPs – include the ground loop efficiency

- ➔ To use REM Well screen for ground loop model, use entry from GSHP library
- ➔ To use vendor-calculated seasonal efficiencies, use entries from heating-only & cooling-only libraries
 - Check the Help for these libraries re: GSHP modeling
- ➔ REM model has fixed assumptions regarding soil characteristics

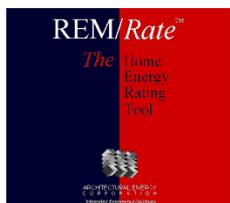

■ Docking Panes

- ➔ Windows for Quick Analysis and Errors/Warnings use docking

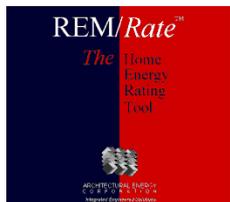

■ Reset Window Layout

- ➔ If Notes or Spreadsheet is moved off the screen, or can't find Errors/Warnings or Analysis panes
- ➔ Brings back the default layout of REM/Rate
- ➔ Under the Tools Menu

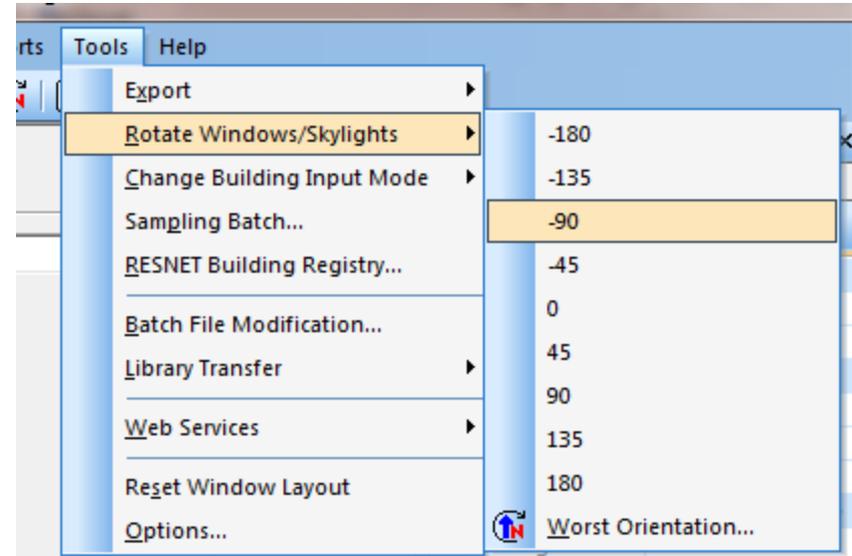

■ Default building

- ➔ On File menu
- ➔ Lets you save/use partially filled out building
 - Your company name, etc.

■ Rotate windows/skylights

➔ Rotate manually

➔ Determine worst-case orientation

□ HERS score, energy costs, design loads

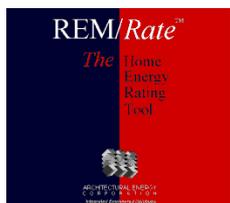

■ Web Services

➔ Registration

- ID/PW must be exact, use copy/paste
- Need to re-register annually or semi-annually to advance expiration date
- Your Provider's expiration date can limit yours until she/he renews

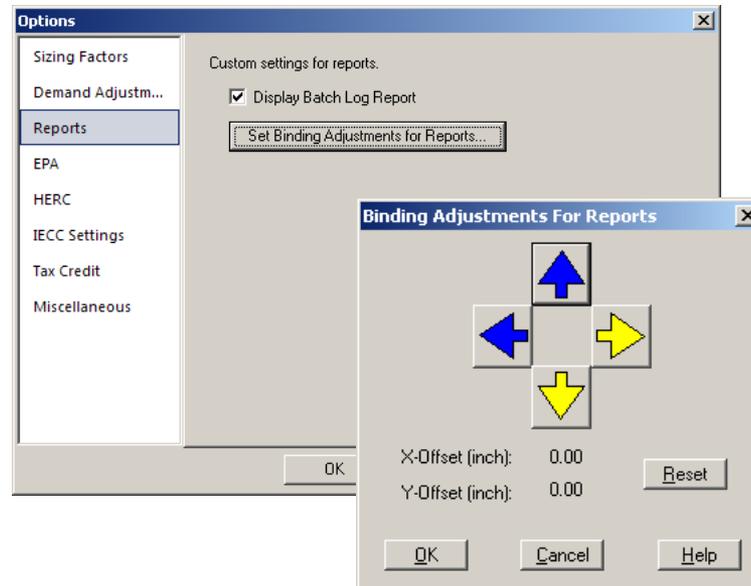

➔ Downloading print permissions

- Also done during registration

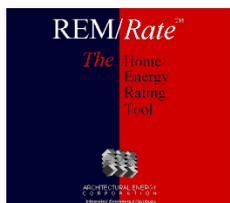

■ Binding adjustments

- ➔ Only applies to the Old Reports tool
- ➔ Slides text over on printed reports to allow for binding

■ Home energy rating certificate

- ➔ HERS provider address
 - Appears in lower right corner
- ➔ Criteria program check
 - Check if home meets energy codes imbedded in software
- ➔ Disable regional criteria screen
 - Add program/regional criteria, check manually
- ➔ Add signature line to report
 - For rater/provider to sign

OPTIONS DIALOG - IECC

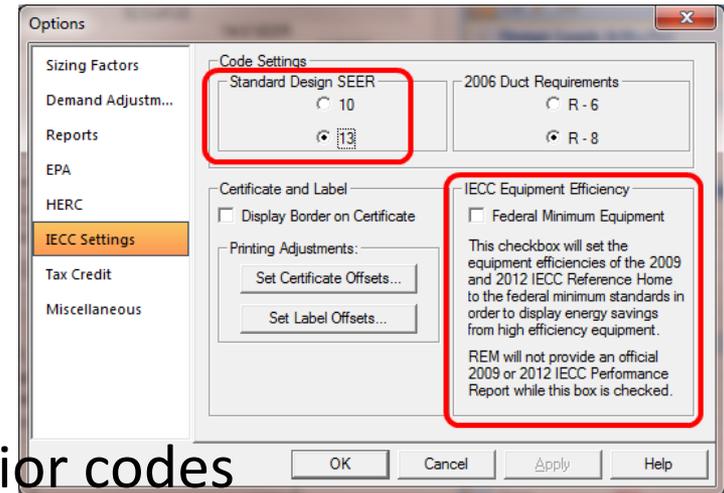

■ IECC Toggles

➔ Standard Design SEER

- ❑ Applies only to 2003 and prior codes
- ❑ Set to SEER 10 or 13, shows on reports

➔ IECC Equipment Efficiency

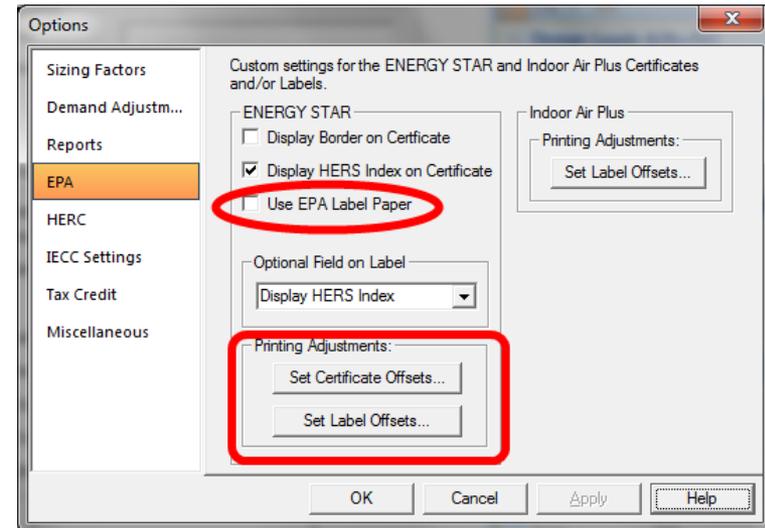

- ❑ Uses Federal minimum equipment efficiency for 2009 & 2012 IECC reference homes
- ❑ 2009 & 2012 IECC Performance Reports are unofficial when this checkbox is marked

OPTIONS DIALOG - EPA

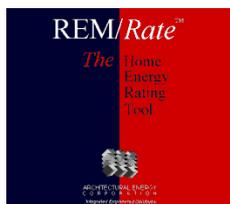

ENERGY STAR certificate

- ➔ Include border on certificate
- ➔ Add rating score to certificate/label
- ➔ Checkbox to use EPA Label Paper with New Reports
- ➔ Adjust printing offset for label (New or Old Reports)
 - ❑ All other printing adjustments apply only to Old Reports !

■ Next Steps:

- ➔ REM/Rate Cloud – Summer of 2014
- ➔ New engine possibilities
- ➔ RESNET ANSI Standard 301
- ➔ New features we have been drooling over
 - ❑ New GSHP Ground Loop Analytical Solution
 - ❑ Add mini-split heat pump routine/library
 - ❑ Remove Integrated HTG/DWH library
 - ❑ RESNET Chapter 8
 - ❑ What do you want/need?

Q & A

INNOVATION

They're not all good ideas
