ANSI/RESNET/ICC 301-2014 Addendum K-2017 Amendment on Roof Solar Absorptance (and Emittance) Test Standard Effective Date November 10, 2017

Revise Table 4.2.2(1) as follows:

Table 4.2.2(1)) Specifications for the Energy Rating Reference and Rated Homes
----------------	--

Building Component	Energy Rating Reference Home	Rated Home
Roofs:	Type: composition shingle on wood sheathing	Same as Rated Home
	Gross area: same as Rated Home	Same as Rated Home
	Solar absorptance = 0.75	Values from Table 4.2.2(4) shall be used to determine solar absorptance except where test data are provided for roof surface in accordance with <u>ASTM Standards C1549, E1918, or</u> <u>CRRC Method # 1ANSI/CRRC</u> <u>S100</u> . Emittance values provided by the
	Emittance = 0.90	roofing manufacturer in accordance with ASTM Standard C1371 <u>ANSI/CRRC S100</u> shall be used when available. In cases where the appropriate data are not known, same as the Reference Home.
Attics:	Type: vented with aperture = 1ft^2 per 300 ft^2 ceiling area	Same as Rated Home

The remaining sections of Table 4.2.2(1) remain unchanged.
