1. Please describe in light of the responsibilities of the RESNET Board why you are the right person to be a member of the RESNET Board of Directors

Given my 16+ years in this industry, starting as an independent HERS Rater, developing into a RESNET Provider, and serving for the past 10 years on the RESNET Board, I have developed some unique insights to a Provider's and Rater's role. My service for other organizations on their Boards and committees increased my knowledge of the responsibilities of a Board member. My absolute commitment to quality and fair dealing is an invaluable asset to the delivering of the Board of Directors' goals and responsibilities.

2. Why is this the right time for you to serve on the RESNET Board?

At this point in my career and the growth of my business, I am able to limit my time in the field and my office so I can put more focus on using my experience as Provider, Rater, and Board member to the benefit of RESNET and its Raters.

3. Please explain your knowledge and/or experience in terms of each of the primary responsibilities of the RESNET Board

In my experience over the last 10 years on the RESNET Board, I have been actively involved in a multitude of Task Forces and Committees. And while all of the time spent has helped me gain an in-depth knowledge of the hows, whats, whos and whys of the Board's primary responsibilities, I believe my appointments and tenure on many Task Forces and Committees are a direct testament to the experience that I have with the strategic vision and fiduciary oversight of RESNET.

4. Describe your experience in either leadership and/or serving on the board of a non-profit organization.

I have founded and developed two successful companies since 2000 (Green Building Consulting and Homes +). I have served on the RESNET Board of Directors for 10 years. I have served on the USGBC SW Ohio Chapter's Board of Directors for 2 years and served as the Chairman, Education Director, etc. of their Residential Green Building Committee for over 10 years.

5. What would you contribute to the RESNET Board?

Experience and Passion. Whether it's through the lens of a Provider, Rater or Board Member, I believe I have demonstrated these contributions over the last decade consistently. Even more specifically, I would like it to be said that one of my greatest previous, current and future contributions would be my commitment to the needs and future of RESNET - such as developing the Cincinnati Green Building Summit which was co-sponsored by RESNET and was given RESNET CEUs. Through my years of experience as a Provider and in-field rater, I have gained knowledge of the types of situations and problems that can be encountered. I've also discovered many different ways of handling those situations and problems. My current, first-hand knowledge and experience will provide valuable input to the RESNET Board of Directors.
