

Energy Engineer III

Oklahoma City, OK

Job ID: 2015-2877

Self-motivated individuals will be able to make a difference in the energy efficiency (EE) industry as an **Energy Engineer III** for CLEARResult in Oklahoma City, Oklahoma. You will lead EE projects at commercial and industrial facilities by identifying energy saving opportunities, developing recommendations, and collecting the necessary information to quantify energy savings. As the project lead, you will guide other less experienced engineers and you will require minimal oversight from senior engineers. Due to your strong technical background, you will work with the national engineering team to develop technical solutions for our programs across North America. This is an important position for our company, and you'll be able to track your results against specific goals and metrics. As CLEARResult continues to grow quickly, success in this position will lead to increased responsibility and opportunities for you.

Responsibilities:

- Technical lead for custom/M&V projects (identify, develop, and calculator energy savings) at commercial and industrial facilities
- Recommend appropriate energy saving measures in identified projects including industrial process improvements, facility automation controls, and variable speed drives
- Quantify savings, costs, and benefits, consistent with program and policy requirements
- Lead M&V projects at commercial and industrial facilities
- Develop and implement measurement and verification (M&V) plans and reports on multiple projects
- Provide technical guidance and training to internal and external parties, including clients and contractors
- Be able to review work and provide effective feedback to other technical personnel
- Utilize effective written and verbal skills to support the all members of the program team and external personnel
- Manage your time and tasks to provide accurate deliverables in the specified time frame
- Report issues and suggest solutions to management in a timely manner
- Travel up to 50% (mostly in-state), with occasional overnight travel

Job Requirements:

- Bachelor's Degree in Engineering (BSME, BSArchE preferred)
- 4 years of related professional experience in energy engineering (industrial, consulting, energy services, and/or utility energy efficiency programs)
- 2 years' experience if completed MS Engineering degree
- Professional Engineer (PE) license is optional
- CEM certification is strongly preferred
- Extensive experience applying IPMVP to custom EE projects within utility programs
- Knowledge of energy-efficiency terminology, technologies, programs, and policies
- Be a subject matter expert in a technical area of expertise
- Excellent math and problem solving skills
- Attention to detail and a desire to perform rigorous quality control
- Able to work at a desk and use a computer for long periods of time
- Able to occasionally use basic hand and power tools, as well as climb ladders for access
- Professional demeanor and ability to work independently without direct supervision
- The successful candidate will be self-motivated and able to prioritize, multi-task, and work under strict deadlines

ABOUT CLEARResult

CLEARResult helps utilities, businesses and individuals make the wise use of energy a way of life. Headquartered in Austin, Texas, CLEARResult designs, markets and implements energy programs around the globe. Our experienced energy experts tailor strategies to our clients' specific needs and circumstances. Through practical technical guidance and the distribution of utility incentives, we help thousands of electric, gas and water utility customers — including schools, local governments, businesses and homeowners — reduce energy use. Our energy experts design and manage energy optimization services for utility companies as well as residential, institutional, commercial and industrial organizations.

We deliver comprehensive energy program and demand-side management strategies and solutions that lower load requirements for utilities, reduce energy bills for end users and lessen the environmental burden on our communities. Through our comprehensive market transformation strategies, customer engagement and education, incentive processing, technical training and support for trade ally partners, we are changing the landscape of energy use locally, nationally and across the globe.

At CLEARResult, we change the way people use energy™.

We take pride in the character of our people and our culture. Our work environment is actively collaborative, intelligent and creative. We enjoy coming to work each day, knowing we're making a difference. As we grow, we continue to look for positive, action-oriented individuals who share our passion for energy efficiency and achieving results for our clients and the environment.
