Session Spotlight
Wish your takeoffs looked this good?

Session: Google SketchUp: Advanced Applications for HERS Raters
Presenters: Doug Bursnall and Peter Oberhammer of EnergyLogic

EnergyLogic has turned Google Sketchup into the Ferrari of take-off worksheets and this session will teach you how to drive. As a special bonus for attending *RF! 2010* we will give you the keys! You will receive a copy of the add-on program that transforms Sketchup from handy drawing tool to cutting edge REM take-off worksheet.

EnergyLogic's specialized add-ons have revolutionized time spent on plans and in the field:

- *Faster plan takeoff time*
- *Easier to learn and use*
- *Visually verifiable*
- *Provides visual connection between model and built home*
- *3D sketches adjustable on the fly*
- *Google SketchUp is FREE*

Recommended Preparation: Not familiar with SketchUp? Brush up on the basics for [free](#).
