Proposed Title: BSR/RESNET/ICC Standard 305-20xx, Standard for the Calculation and Labeling of the Energy Performance of Multi-Family Dwellings in Residential Buildings using an Energy Rating Index

Proposed Purpose: The provisions of this document establish residential energy rating and labeling Standards, consistent with the provisions of the Energy Policy Act of 1992, which provide for uniformity and consistency in the rating and labeling of such buildings.

Proposed Scope: This standard is applicable to all multifamily dwellings other than one- and two-family dwellings.

Project Need: Critical.

Stakeholders: RESNET, EPA, DoE, Rating Companies, QA Providers, Software Providers, Multifamily Developers, Multifamily Builders, and Manufacturers.

Attached Documents (list): To be developed by Multi-Family Sub-Committee
