Guidelines and Definitions

Defining "Bias" and "Conflict of Interest"

Bias: The question of potential sources of "bias" ordinarily relates to views stated or positions taken that are largely intellectually motivated or that arise from the close identification or association of an individual with a particular point of view or the positions or perspectives of a particular group. Such potential sources of bias are not disqualifying for purposes of RESNET® Board service. It is necessary, in order to ensure that the board is fully competent, to elect members in such a way as to represent a balance of potentially biasing backgrounds or professional or organizational perspectives.

Conflict of Interest: It is essential that the work of the RESNET® Board of Directors not be compromised by any significant conflict of interest, or in some circumstances the significant appearance of conflict of interest, on the part of any member of the board. For this purpose, the term "conflict of interest" means any financial or other interest which conflicts with the service of an individual because it (1) could impair the individual's objectivity or (2) could create an unfair competitive advantage for any person or organization. The existence of a significant conflict of interest ordinarily disqualifies an individual from service.

How can conflicts of interest arise?

Conflicts of interest can occur when:

When a board member as a strong personal, financial, or professional interests in seeing that a project/policy produce a particular outcome; and

An agency, a sponsor, or a private organization or company attempts either to influence individual board member or to skew the body of information reviewed by the board.

What is done to avoid conflicts of interest?

Submittal and evaluation of the statement of affiliations and interests that lists professional connections and indicates any positions taken in relevant public statements at the time of nomination and disclosures during board meetings are fundamental to ensuring conflicts of interest and appearances of conflicts of interest are avoided.

Note: This form and the definitions, included here are derived from forms and considerations as presented by ASHRAE.
