### Candidate Questions

1. Please describe in light of the responsibilities of the RESNET Board why you are the right person to be a member of the RESNET Board of Directors

I believe I am the right person to be a member of the RESNET Board of Directors because I have seen nearly all aspects of the industry over my nearly seven years working within it. I started as a simple field inspector, but now I am the primary QAD of a large Rating Company. I developed our processes from the ground up and gained a deep understanding of RESNET in the process of doing so. I am also becoming more well known within the industry being the current Chair of the RESNET ELC.

2. Why is this the right time for you to serve on the RESNET Board?

Now is the right time for me to serve on the RESNET Board. I have already been to and spoke at a Board meeting in 2022 as Chair of the ELC. I have been exposed to many high profile figures in the industry now. I see this as an opportunity both for me to grow and spread roots further into the industry as well as for me to provide new insight and young, but experienced blood to the table.

3. Please explain your knowledge and/or experience in terms of each of the primary responsibilities of the RESNET Board

I understand that the Board maintains RESNET's public face and ensures the growth of RESNET over time by changing aspects of the organization as the world around it evolves. Seeing RESNET grow in the national marketplace is the most interesting aspect of being part of the Board for myself. I plan to thoroughly understand all of the roles of the Board through experience being a part of it.

4. Describe your experience in either leadership and/or serving on the board of a non-profit organization.

At 15 lightyears I continuously educate and mentor Raters and RFIs. I also developed our Training Providership and its courses, offering them both to internal students within 15 lightyears as well as external students. Leadership is a large part of my position at 15 lightyears as a QAD and Instructor. As

Chair of the RESNET ELC I lead the discussions that take place within the ELC and provide a face for the organization giving public speeches.

5. What would you contribute to the RESNET Board?

I bring to the Board a young, yet highly experienced personality within the RESNET industry. I am likely one of the most experienced individuals of my age. Having worked in this space since I was nineteen years old, this is the first real career of mine and I have taken it upon myself to excel at it. I understand the RESNET's Rating process very well through experience at all levels of the standards from field testing to QA. Being Chair of the ELC has exposed me to many different Raters, RFIs, and others across the nation.
