I had the privilege of serving on the RESNET Board for ten years as Chair of the Suppliers Advisory Board and would welcome the opportunity to return as an Associate Member. Drawing on my experience leading a national trade association, building industry coalitions, and advancing energy policy, I can help RESNET navigate a rapidly changing policy environment. With housing affordability and energy policy increasingly focused on first cost rather than long-term value, RESNET needs strong advocates. I look forward to strengthening partnerships, expanding HERS ratings, and ensuring RESNET remains the nation's leading voice for home energy performance.
