

A NEW MILESTONE

RESNET is a recognized national standards-making body for building energy efficiency rating and certification systems since 1995. The RESNET rating industry is celebrating another milestone:

Over 3 MILLION HOMES in the United States have been HERS rated!

WHY HERS HOMES?

Home Energy Rated System (HERS®) homes are environmentally friendly homes that provide better home comfort, lower running costs and higher resale values. Building code officials, local utilities, and government agencies at all levels recognize the HERS index score as an official verification of energy performance driving demand and confirming RESNET and the HERS index as the industry gold standard.

BUILDING A GREENER FUTURE

3 million HERS Rated homes have:

Reduced carbon dioxide emissions, by over 49 million tons,* the equivalent of taking nearly 9.7 million passenger vehicles off the road for one year.**

Saved over \$8 Billion in energy costs for homeowners**

Improved the health and comfort of more than 13 million residents**

Employed thousands of workers in the energy efficiency industry**

**RESNET National Registry

RESNET raters, inspectors, providers, suppliers, and homebuilders have all contributed in RESNET's success of reaching this milestone.

Thank you for your commitment to a future with more environmentally friendly homes.
