RESNET Builder Data Sharing

RESNET®
RESIDENTIAL ENERGY SERVICES NETWORK

POWERED BY
ekotrope

Easily access your data for 45L tax credits, Freddie Mac Green MBS, ESG Reporting and ENERGY STAR

New offerings allow home builders to access their home energy rating data.

With the recent increases in tax incentives, rebate programs, ESG reporting, and energy codes, HERS Ratings provide more value to builders than ever before. However, to capture that value, builders need robust, accurate ways to access the data on their rated homes.

RESNET's new data offerings, powered by Ekotrope, enable builders to access this data and maximize their incentives and net profits.

Available data-sharing options:

1. Direct Connection to Builder's Internal Systems

▶ API Connection (requires builder set-up)

▶ Real-time data

▶ JSON API format

▶ Essential or Advanced Data Available

2. Excel Spreadsheet Exports

▶ Quarterly reports delivered via email

▶ Essential Data Available

3. Business Intelligence Dashboard

▶ Live access to data via a web dashboard, updated daily

▶ Tracking, filtering, and analysis of home energy performance

▶ Downloadable spreadsheet exports

▶ Essential or Advanced Data Available, plus more upon request

Essential Data Includes:

▶ Home Address

▶ HERS Index

▶ ENERGY STAR

▶ DOE ZERH

▶ Energy Consumption

▶ Energy Cost

▶ Carbon Emissions

▶ ACH50 (envelope leakage)

▶ Builder Home ID

▶ Other Essential Rating Data Fields (ask for full listing)

Advanced Data Includes:

▶ All 'Essential Data' fields

▶ Additional home characteristics such as:

   ▶ Envelope R-values

   ▶ Window specs

   ▶ HVAC types and efficiency

   ▶ Note: schema may change over time for raw XML Advanced Data via API.
