Candidate Questions

1. Please describe in light of the responsibilities of the RESNET Board why you are the right person to be a member of the RESNET Board of Directors

In 2007, in the midst of a major recession, myself and 2 partners founded Veritas QA, LLC, a building inspection and energy rating company serving Central and South Texas. Over the past 15 years we have provided building inspection and energy rating services to over 700 individual builder clients. We have performed over 2,000,000 inspections, certified over 30,000 energy ratings, and established ourselves as leaders in the residential homebuilding industry in Central and South Texas. If elected to the RESNET Board of Directors, I will bring an understanding of the challenges and opportunities facing Raters, Rating companies, and the homebuilders that we all serve. I am a believer in RESNET and its mission and believe I can offer a unique perspective to the Board.

2. Why is this the right time for you to serve on the RESNET Board?

I have over 25 years of experience in the residential building industry. With experience as real estate developer, broker, custom homebuilder, ICC Residential Combination Inspector, HERS Rater, Quality Assurance Designee, and business owner, I bring practical experience, common sense, and industry insight. Having played a key role in building a successful company whose mission revolves around residential quality control and energy efficiency, I have a vested interest in the direction of RESNET and its future success.

3. Please explain your knowledge and/or experience in terms of each of the primary responsibilities of the RESNET Board

Maintaining strategic vision, conducting fiduciary and governance oversight are keys to the success of any organization. Throughout my professional career, my role has been focused on planning, developing a vision, implementing, and maintaining it. As industry, economic and market changes occur, providing stability and consistency within an organization is essential. I want to be involved in the continued advancement of RESNET and its vision, to the benefit of its members and the industry it serves.

4. Describe your experience in either leadership and/or serving on the board of a non-profit organization.

I have never served on the board of a non-profit organization. I do, however, have experience working with and within business organizations, homebuilding associations, communicating with and educating municipal building inspection departments, and have met with US Congressional members relating to energy efficiency involving military housing.

5. What would you contribute to the RESNET Board?

As owner of a mid-sized Rating Provider which provides quality control inspections and energy rating services to the nations largest homebuilders, in one of the busiest markets in the country, I believe I bring a valuable perspective of the challenges facing Raters and Rating Companies, homebuilders, and the residential building industry as a whole.
